

Description of Additional Supplementary Files

File name: Supplementary Data 1

Description: Genes Associated with Adverse Health Outcomes. Table providing information about the genes associated with adverse health outcomes as described in the text.

File name: Supplementary Data 2

Description: Participant Metadata and Microbial Relative Abundance. Table providing data necessary to perform described analyses based on the participant metadata and the microbial relative abundance.

File name: Supplementary Data 3

Description: HMO Gene Clusters. Table providing the data necessary to perform described analyses involving HMO gene cluster.

File name: Supplementary Data 4

Description: AMR and VF Abundance. Table providing the data necessary to perform described analyses involving AMR and VF genes.

File name: Supplementary Data 5

Description: Metabolomics. Table providing metabolomics data necessary to perform described analyses.

File name: Supplementary Data 6

Description: Adverse Outcomes. Table providing adverse outcome data necessary to perform described analyses.
